## A. Program Information

## Program Mission Statement

Please enter your mission statement here.

## Answer:

The mission of the Humanities Department is to create a community of learners who explore and value the diversities of cultures, thought, perspectives, literatures and languages of humanity; • critically reflect on and analyze multiple dimensions of human identity and experience; • contribute to scholarship and creative production and • act as responsible global citizens committed to principles of freedom, equality, justice and participatory democracy.

## Program Level Student Learning Outcomes

Please list the program level student learning outcomes.

## Answer:

Students should be able to: synthesize their critical thinking, imaginative, cooperative and emphatic abilities as whole persons on order to $\cdot$ contextualize knowledge • interpret and communicate meaning in both written and oral form $\cdot$ cultivate their capacity for personal as well as social change

Enrollment Variables and Trends

| Enrollment Trends <br> Business \& Social Sciences - Humanities-FH |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
|  | 2014-15 | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 5-yr \%Inc |

## B. FTES - Enrollment Trends

1. In the data table above, what does the FTES data trend indicate?
$\square$ the data trend shows an increase in FTES
$\square$ the data trend shows a decrease in FTES
$\square$ the data trend shows no change in FTES
Discuss the factors that would help the college understand these trends and whether there are tangible reasons for the increase or decrease.

## Answer:

The Humanities Department has shown tremendous growth over the last five years (360\%). Due to innovative new course development and hiring of dynamic, qualified part-time faculty, the department has capitalized on the need for engaging and impactful courses that apply the interdisciplinary and investigative approach that sets the study of Humanities apart from other academic programs.
Furthermore, during the summer, the program attracts a great number of students from the UC and CSU systems eager to fulfill their graduation requirements. The recently developed transcriptable Certificate of Achievement has further increase demand for course offerings in Humanities.
2. Looking at the data trend, has the faculty/staff discussed proposed actions to stabilize/increase FTES?
$\square$ yes
$\boxed{\square}$ no
If yes, describe the proposed actions for stabilizing/increasing the FTES.

## Answer:

A comparison with the size of the Humanities Department at De Anza strongly indicates further growth potential for the Humanities Department at Foothill. To increase FTES, investment in faculty development (particularly in the area of on-line pedagogy), further course development and - most importantly - additional full-time staffing is required. Currently, the program is headed by a full-time instructor working at $50 \%$. In contrast, other programs in BSS of similar size have two full-time instructors working at $100 \%$. Opportunities for growth and innovation remain unrealized due to a staffing shortage.

## C. Sections - Enrollment Trends

## 1. In the data table above, what does the data trend indicate about the number of sections offered?

$\square$ the data trend shows an increase in sections
$\square$ the data trend shows a decrease in sections
$\square$ the data trend shows no change in sections
If the data trend shows an increase or decrease in sections, explain why the number of sections increased or decreased.

## Answer:

Due to high demand for Humanities courses particularly those taught on-line, the number of sections (up 455\% over 2014-15) has continued to increase steadily over the last five years. Broadly, the reasons for this have already been outlined above, but in addition, the development of Honors versions for most HUMN courses has aided in the trend. Furthermore, on-campus presence and awareness for Humanities courses has been boosted by the Humanities Mellon Scholars Program now in its third year. The Humanities Lecture Series under the guidance of part-time instructor Aida Dargahi has further contributed to this trend.

If the data indicates an increase in sections with a decrease in FTES, explain why the number of sections increased while FTES decreased.

## Answer:

## D. Productivity - Enrollment Trends

1. In the data table above, what does the data trend indicate about the productivity number?
$\checkmark$ the data trend shows the productivity number increased
$\square$ the data trend shows the productivity number decreased
$\square$ the data trend shows no change in the productivity number

If the data trend shows an increase or decrease in productivity, explain why the productivity increased or decreased.

## Answer:

The data shows an increase of $5.2 \%$ in productivity over the last five years. Productivity numbers have always been high, so this increase must be attributed to careful scheduling and the quality, dedication and hard work of our Humanities faculty.
2. Does the data trend suggest changes are necessary to improve productivity?
$\square$ yes
$\checkmark$ no
If yes, describe the proposed actions for stabilizing/increasing the productivity number.

## Answer:

N/A

## E. Enrollment by Student Demographics

## Enrollment Distribution

by Gender

|  | 2014-15 |  | 2015-16 |  | 2016-17 |  | 2017-18 |  | 2018-19 |  |

## a. Enrollment by Gender

The following questions concern enrollment distribution by gender.

1. In the data table above, what does the data trend indicate about program enrollment by gender?

Females
$\square$ the data trend shows an increase in the female enrollment rates
$\square$ the data trend shows a decrease in the female enrollment rates
$\checkmark$ the data trend shows no change in the female enrollment rates
Males
$\square$ the data trend shows an increase in the male enrollment rates
$\square$ the data trend shows a decrease in the male enrollment rates
$\boxed{\nabla}$ the data trend shows no change in the male enrollment rates
If the data trend shows a change in male or female enrollment, explain why there was a change.

## Answer:

N/A
2. Does your program differ in the percentage of males to females, in this most recent year, compared to the College? (College 2018-19 = 52\% Female, 48\% Male)
$\square$ yes
$\boxed{\square}$ no
If the data indicates a lack of gender parity in your program as compared to the college percentages, what is the source of that disparity and what proposed/planned actions is the program taking to achieve parity?

## Answer:

N/A

## Data Table for Enrollment by Gender of Declared Majors https://foothill.edu//programreview/prg-rev-docs/fh-programreview2019_20enroll-by-gender-and-declared-major.pdf (https://foothill.edu//programreview/prg-rev-docs/fh-programreview2019_20enroll-by-gender-and-declared-major.pdf)

Click the link to view Enrollment by Gender of Declared Majors data table and respond to the questions below.
3. In the data table above, what does the data trend indicate about enrollment (headcount) by gender of declared majors in the program?
Females
$\square$ the data trend shows an increase in the female enrollment of the declared major
$\square$ the data trend shows a decrease in the female enrollment of the declared major
$\checkmark$ the data trend shows no change in the female enrollment of the declared major
Males
$\square$ the data trend shows an increase in the male enrollment of the declared major
$\square$ the data trend shows a decrease in the male enrollment of the declared major
$\boxed{\nabla}$ the data trend shows no change in the male enrollment of the declared major

## b. Enrollment by Ethnicity

The following questions concern enrollment distribution by ethnicity.

1. In the data table above, what do the data trends indicate about program enrollment by ethnicity?

## African American

$\square$ the data trend shows an increase in the African Americans enrollment rates $\square$ the data trend shows a decrease in the African Americans enrollment rates $\nabla$ the data trend shows no change in the African Americans enrollment rates

## Asian

$\square$ the data trend shows an increase in the Asian enrollment rates $\square$ the data trend shows a decrease in the Asian enrollment rates $\square$ the data trend shows no change in the Asian enrollment rates

Filipinx
$\square$ the data trend shows an increase in the Filipinx enrollment rates
$\square$ the data trend shows a decrease in the Filipinx enrollment rates
$\checkmark$ the data trend shows no change in the Filipinx enrollment rates

## Latinx

$\square$ the data trend shows an increase in the Latinx enrollment rates $\square$ the data trend shows a decrease in the Latinx enrollment rates $\boxed{\square}$ the data trend shows no change in the Latinx enrollment rates

## Native American

$\square$ the data trend shows an increase in the Native American enrollment rates $\square$ the data trend shows a decrease in the Native American enrollment rates $\checkmark$ the data trend shows no change in the Native American enrollment rates

## Pacific Islander

$\square$ the data trend shows an increase in the Pacific Islander enrollment rates $\square$ the data trend shows a decrease in the Pacific Islander enrollment rates $\checkmark$ the data trend shows no change in the Pacific Islander enrollment rates

White
$\square$ the data trend shows an increase in the White enrollment rates
$\square$ the data trend shows a decrease in the White enrollment rates
$\square$ the data trend shows no change in the White enrollment rates
Decline to State
$\square$ the data trend shows an increase in the Decline to State enrollment rates the data trend shows a decrease in the Decline to State enrollment rates $\square$ the data trend shows no change in the Decline to State enrollment rates
2. Does your program differ in enrollment distribution among ethnic groups, in this most recent year, compared to the College enrollment by ethnic group? (College 2018-19 = 5\% African American, 30\% Asian, 5\% Filipinx, 26\% Latinx, 0\% Native American, 1\% Pacific Islander, 29\% White, 4\% Decline to State)
$\boxed{\square}$ yes
$\square$ no
If yes, looking at the ethnic groups above, explain changes identified over the past five years for each ethnic group (address each ethnic group by bullet point).

## Answer:

There is a $2 \%$ discrepancy between the college's overall enrollment of Latinx students and the number of Latinx students served in the Humanities Department.
3. Do the data trends suggest programmatic actions are necessary to address disparities in enrollment by ethnicity, including low enrollment within a particular group?

```
\square
```

$\square$ no
If yes, describe the proposed actions for addressing disparities in enrollment by ethnic group within the program.

## Answer:

The Humanities Department is planning to develop an additional course focused on how Indigenous and diasporic peoples have articulated both belonging and separateness from the United States. Drawing on fiction, film, historical documents, documentaries, photographs, nonfiction, and memoirs, this course explores issues such as sovereignty, self-determination, decolonization, anti-racism, gender equality, and land claims. The course will provide students the opportunity to critically reflect on narratives of citizenship and articulate the tension between coercive practices of exclusion and assimilation.

## F. Student Course Success

## Course Success Rates by Unit

Printed on 1/11/2020

## a. Student Course Success

1. In the data table above, what does the data trend indicate about overall course success?
$\nabla$ the data trend shows an increase in the students' course success percentage
$\square$ the data trend shows a decrease in the students' course success percentage
$\square$ the data trend shows no change in the students' course success percentage
If the data trend shows an increase, decrease, or no change in students' course success percentage, explain what programmatic factors led to such a trend.

## Answer:

We attribute the $10 \%$ increase in success rate to the maturation of our new courses, the dedication and excellence of our instructors and a stabilization of new-hires. Course designs for HUMN 4, HUMN 7 and HUMN 8 are unique and required extensive innovation in course design and text selection. Furthermore, we had significant turn over among our faculty, but over the last two years, new hiring has stabilized with summer quarter, during which we experience a large increase in enrollment, being the exception. Furthermore, ur summer student population is comprised of many UC/CSU students with higher academic skills.
2. Do the data suggest changes are necessary to improve student course success?
$\boxed{\square}$ yes
$\square$ no
If yes, describe the proposed actions for stabilizing/increasing the student's course success percentages.

## Answer:

[^0]
## b. Student Course Success by Student Groups

1. In the data table above, what is the observed trend for course success rates for African American, Filipinx, and Latinx student groups?
$\square$ the data trend shows an increase in the course success percentage
the data trend shows a decrease in the course success percentage
the data trend shows no change in the course success percentage
2. In the data table above, what is the observed trend for course success rates for Asian, Native American, Pacific Islander, White, and Decline to State student groups?
$\square$ the data trend shows an increase in the course success percentage
$\square$ the data trend shows a decrease in the course success percentage
$\square$ the data trend shows no change in the course success percentage
3. In the data table above, is there a course success gap between African-American, Latinx, Filipinx student groups and Asian, Native American, Pacific Islander, White, Decline to State student groups?
$\square$ yes
$\square$ no
If the data trend shows an increase or decrease in course success gap, explain why the course success gap increased or decreased.

## Answer:

The increase in student success for African American, Filipinx and Latinx student groups can be attributed to the colleges overall efforts to reduce the achievement gap. In addition, the Humanities Mellon Scholars program is aimed at low income, Latinx and African American students, and the additional support of Faculty mentors shows a positive impact on the success of this student population.
4. Does the data suggest that changes are necessary to decrease student course success gap between AfricanAmerican, Latinx, Filipinx student groups and Asian, Native American, Pacific Islander, White, and Decline to State student groups?

If yes, what actions are program faculty and staff engaged in to decrease the course success gap between African-American, Latinx, and Filipinx student groups and Asian, Native American, Pacific Islander, White, and Decline to State student groups?

## Answer:

We consider class-size to be an equity issue. For that reason we advocate for a class size reduction (see above). Humanities courses are heavily dependent on writing skills to contextualize knowledge and to interpret and communicate meaning. Research indicates, that early personalized and thoughtful intervention in boosting students' ability to develop writing skills, be motivated to express their voices and to feel validated has a powerful impact on equity. The Humanities Department proposes a five-year trial period of reduced seat counts in all our courses from 50 to 35 to measure and study its effects on closing the achievement gap.

## G. Student Course Success by Demographics

## a. Student Course Success by Gender

The following questions concern student success rates by gender.

# Course Success Rates by Group 

Success Rates by Gender<br>Business \& Social Sciences - Humanities-FH

Some courses may continue to be listed but no longer have data due to renumbering or because the course was not offered in the past five years.
Printed on 1/11/2020

1. In the data table above, what does the data indicate about program course success by gender?

Females
$\checkmark$ the data trend shows an increase in the female course success rates
$\square$ the data trend shows a decrease in the female course success rates
$\square$ the data trend shows no change in the female course success rates

## Males

$\boxed{\square}$ the data trend shows an increase in the male course success rates
$\square$ the data trend shows a decrease in the male course success rates
$\square$ the data trend shows no change in the male course success rates
If the data trend shows an increase or decrease in the male or female student course success percentages, explain why the percentage increased or decreased for both.

## Answer:

The increase is attributable to the overall increase in student success (see above),
2. Do the data suggest changes are necessary to improve female or male student course success percentage rates?

## $\square$ yes

$\boxed{\square}$ no
If yes, describe proposed actions to stabilize/increase the course success rates for either male or female.
$\square$

## Answer:

N/A

## b. Student Course Success by Ethnicity

These questions concern the course success rates of students by ethnicity.

1. In the data table above, what does the data trend indicate about program student course success by ethnicity?

## African Americans

$\square$ the data trend shows an increase in the African Americans course success rates
$\square$ the data trend shows a decrease in the African Americans course success rates
$\nabla$ the data trend shows no change in the African Americans course success rates

## Asian

$\square$ the data trend shows an increase in the Asian course success rates
$\square$ the data trend shows a decrease in the Asian course success rates $\boxed{\nabla}$ the data trend shows no change in the Asian course success rates

Filipinx
$\square$ the data trend shows an increase in the Filipinx course success rates $\square$ the data trend shows a decrease in the Filipinx course success rates $\nabla$ the data trend shows no change in the Filipinx course success rates

## Latinx

$\boxed{\nabla}$ the data trend shows an increase in the Latinx course success rates $\square$ the data trend shows a decrease in the Latinx course success rates $\square$ the data trend shows no change in the Latinx course success rates

Native American
$\square$ the data trend shows an increase in the Native American course success rates
$\square$ the data trend shows a decrease in the Native American course success rates
$\boxed{\nabla}$ the data trend shows no change in the Native American course success rates

## Pacific Islander

$\square$ the data trend shows an increase in the Pacific Islander course success rates $\square$ the data trend shows a decrease in the Pacific Islander course success rates $\checkmark$ the data trend shows no change in the Pacific Islander course success rates

White
$\boxed{\nabla}$ the data trend shows an increase in the White course success rates
$\square$ the data trend shows a decrease in the White course success rates
$\square$ the data trend shows no change in the White course success rates
Decline to State
$\boxed{\nabla}$ the data trend shows an increase in the Decline to State course success rates
$\square$ the data trend shows a decrease in the Decline to State course success rates
$\square$ the data trend shows no change in the Decline to State course success rates
If the data trend shows a decrease in any of the student ethnic groups' course success rates, explain why the percentage decreased for each (address each ethnic group by bullet point).

## Answer:

2. Do the data indicate a gap in course success for any of the ethnic groups as compared to other groups?
$\boxed{\square}$ yes
$\square$ no
If yes, describe the reasons for the gap in course success.

## Answer:

Course success rates are lower for African American and Latinx students. Also, withdrawal rates are higher for both these student populations. This gap can be partially attributed to insufficient foils for African American and Latinx students to critically reflect upon and analyze their particular experiences. The department has made great strides in moving away from its traditional focus on Western Civilization, but more work needs to be done not only in the inclusion of relevant material in existing courses but also in the development of new courses.
3. Do the data suggest that changes are necessary to improve program course success equality?
$\boxed{\square}$ yes
$\square$ no
If yes, describe the proposed actions for stabilizing/improving the course success by ethnicity.

## Answer:

Continue efforts in course redesign to include culturally relevant content for African American and Latinx students. Integrate theories of cultural production necessary to ensure that students develop and refine their skills to actively understand and communicate markers of inequality within social spaces. Provide opportunities for service-leadership to provide students with the opportunity to apply their acquired skills to contribute to and participate in their local communities.

Use this opportunity to provide feedback on the template or address a topic that was not previously discussed.

## Answer:

This Program Review was generated in a collaborative effort by the following faculty in the Humanities Department at Foothill College: Falk Cammin, Aida Dargahi, Tony Kashani, Natalie Latteri, Mona Rawal and Paula Vaughan.

This form is completed and ready for acceptance.

[^0]:    Numerous studies show that a student-teacher ratio is tantamount to student success. For example, Fort Scott Community College (Kansas) reports a graduation/transfer rate of 87 percent with a student-teacher ratio of 12:1. Source:
    http://www.aacc21stcenturycenter.org/article/small-class-size-can-boost-success/. To increase student success, we propose a reduction
