

College Curriculum Committee
Meeting Minutes
Tuesday, May 1, 2012
2:06 p.m. - 3:38 p.m.
President's Conference Room

<u>Item</u>	<u>Discussion</u>
1. Minutes: April 17, 2012	Minutes approved as written. M/S/C (Armstrong, Murray)
2. Announcements: a. Program Completion Paper: CCRC "Get with the Program: Accelerating Community College Students' Entry into and Completion of Programs of Study" 2012 b. Division Reports c. Other	Speaker: Carolyn Holcroft a. This paper has recommendations regarding how colleges can start collecting data for action. Baker cautioned the group to take the information with a grain of salt. This doc is definitely based on certain assumptions. Holcroft directed attention to suggestions for local use, at end of paper. Some interesting ideas and food for thought/discussion. Holcroft also distributed FH data from Fall 2011 regarding education goals that our students are declaring when they register. b. History AA-T degree proposal is being reviewed by the division curriculum and should be to this body shortly. c. Please remind your faculty that it is imperative to turn grades in ASAP at conclusion of quarter. Turning in grades late causes huge problems for students. CSUs/UCs have rescinded transfer offers because we don't get grades to them by their deadline. We are also at disadvantage b/c we are on quarter system and finish later so it's important for us to be especially quick. Once grades are turned in via portal, they are only posted or "rolled" once a week which means if they're not turned in immediately it could take an additional week before they make it onto the transcript, and then there's additional processing time for the transcripts to be sent to transfer schools/employers. Can also help students by reminding them to turn in transcript request early (10 th week of quarter is good) Reminder: GE Colloquium is coming up 5/18.
3. Consent Calendar: GE Applications for 2013-14	Speaker: Carolyn Holcroft (Cashmore, Ziegenhorn) Approved. C S 2A and SPED 61.
4. Program Review Templates	Speaker: Holcroft Holcroft introduced the IP & B developed documents regarding Program Review Committee Draft charge and proposed templates. This information is being distributed in multiple venues to ensure that all stakeholders have opportunity to review and respond. <ul style="list-style-type: none">• Review PRC charge and proposed process, ask constituents for feedback.• Please also look at the lists of programs and review the templates.<ul style="list-style-type: none">○ Questions about what constitutes a "program," Holcroft noted that there is not a single binding definition and we must clarify our definitions as they pertain to our own processes and procedures. IP&B will be working on this.○ Although some of the programs may not have their own heading on template list, every attempt was made to put them under logical headings, usually under the heading of the Office or department that provides supervision.○ Please review the templates in reference to your

	<p>program. Of them, you'll have the opportunity to select the one that is the best fit. This is moving quickly so please respond ASAP.</p>
5. Repeatability Update	<p>Speaker: Carolyn Holcroft The State Chancellor's Office has provided some information regarding the proposed changes to the repetition and repeatability language in title 5. Must revise our CORs no later than Fall 2012 in order for the changes to become effective Fall 2013.</p> <ul style="list-style-type: none"> • Repeatability for disability students: repeat is possible as long as the course is specifically designed for students with disabilities, not a "regular" course that accommodates a student with disabilities. • Leveling of courses: language unclear about whether quarter schools may have 4 levels, or six levels (language says six times). CH/KM to get clarification from Chancellor's Office. Important to note that withdrawals and failed attempts count against the six "times." Will clarify and bring back. • 55041: talks about those courses that are repeatable based on UC/CSU requirements - clarification that if UC/CSU requires a course to be repeated, we can also allow the course to be repeated (must document). • A "significant lapse of time" is defined in this document as "no less than 36 months". Must meet specific conditions before allowing student to repeat for recency - please ask for help if you are considering this option. • The curriculum team will write a short reference sheet for direction as soon as BOG approves final language. • In interim, faculty can check their CORs to remind themselves which courses are currently listed as repeatable, and begin to think about alternative ways for students to meet the outcomes/objectives. E.g. will faculty need to create levels? Create separate courses?
6. CLEP Catalog Statement	<p>Speaker: Carolyn Holcroft</p> <ul style="list-style-type: none"> • In front of us is the language for the 2012-13 Catalog. Language approved by consensus to go into the 2012-13 Catalog (Starer, Ziegenhorn). • Reminder that we did agree at last meeting that we don't want to "blanket approve" accepting the CCC-GE CLEP Exam Score Equivalency List. • Clarification that if a student gets their CSU-GE breadth certification from us (Foothill) we are obliged to count and "pass along" any CLEP exams that CSUs accept • Discipline faculty must review CLEP exam list and determine whether they will accept a particular score for credit towards a majors requirement. • Discipline faculty should also collaborate to review the CCC GE CLEP list to determine whether they would support accepting ANY of these exams towards any FH GE area. • As discussions progress and we make decisions, that info can be updated on the web site. • Please have discussions in your divisions and be prepared to take action at the June 6 CCC meeting.
7. SB 1440 Update (Transfer Degrees)	<p>Speaker: Bernie Day</p> <ul style="list-style-type: none"> • Development and implementation of AA-T/AS-Ts have raised huge issues and concerns across all areas on our campus.

	<ul style="list-style-type: none">• Our Registrar's Office has been hugely impacted - they must ensure that final course grades AND confirmation of transfer degree completion has been documented on student transcript. Must be done quickly or student may lose benefits guaranteed by AA-T.• UCs Transfer Pathways have begun to be developed. They are afraid that if students feel that they have a guarantee to CSUs, they may just go with that rather than attempt to transfer to UCs.• Nine CSUs have announced that they will only take transfers with transfer degrees Spring 13. Transfer students will be given priority over "local" students.• When creating AA-T, please keep in mind that some TMCs are very broad so faculty must be very mindful when choosing appropriate courses<ul style="list-style-type: none">○ If too many options and student chooses wrong ones, although student may be accepted for transfer they will be required to take the "missing" lower division courses at the CSU and miss out on chance to take more upper division courses.○ Also important to consider UC requirements while reviewing the TMCs to see if it's easy to create something that's appropriate for both.○ Please consult with Bernie Day EARLY in the process as you develop transfer degrees.

Attendees: K. Armstrong, J. Baker, F. Cammin, R. Campbell, B. Cashmore, B. Day, I. Escoto, M. Francisco, R. Hartwell, C. Holcroft, K. Jordahl, M. Knobel, D. MacNeil, K. Messina, P. Murray, P. Starer, K. Svetich, V. Villanueva, B. Ziegenhorn
Minutes recorded by: C. Nuñez

FOOTHILL COLLEGE
College Curriculum Committee
New Course Proposal

*This form should be completed by the faculty author as preparation to writing a new course. Your division CC rep can assist you in completing it appropriately, and will forward it to the Office of Instruction for inclusion as an announcement at the next available CCC meeting. The purpose of this form is **interdisciplinary communication**. The responsibility to rigorously review and approve new courses remains with the divisional curriculum committees.*

Date Proposal Given to Division CCC Rep:

Proposed Number: CS 20A

Proposed Title: PROGRAMMING IN C#

Proposed Catalog Description:

This course is an introduction to the C# programming language and the .NET platform. It is intended for CS majors as well as non-majors and professionals seeking C# programming experience. Topics include object oriented programming, graphical user interfaces, elementary data structures, algorithms, recursion, data abstraction, code style, documentation, debugging techniques and testing.

Proposed Discipline: CS (Computer Science)

Comments & Other Relevant Information for Discussion: This course is based on a prior course CIS 19A which was taught successfully for several years.

Proposed Need/Justification Statement: This course is a restricted support course for the AS Degree in Computer Science

To which Degree(s) or Certificate(s) would this course potentially be added? AS Degree in Computer Science

Instruction Office:

Date Proposal Given to Division CCC Rep:

Proposed Number: CS 21A

Proposed Title: PROGRAMMING IN PYTHON

Proposed Catalog Description:

This course introduces students to the Python language and environment. It is intended for CS majors as well as non-majors and professionals seeking Python programming experience. Covers topics including object oriented programming, elementary data structures, modules, algorithms, recursion, data abstraction, code style, documentation, debugging techniques and testing.

Proposed Discipline: CS (Computer Science)

Comments & Other Relevant Information for Discussion: This course is based on a prior course CIS 68K which was taught successfully for several years.

Proposed Need/Justification Statement: This course is a restricted support course for the AS Degree in Computer Science

To which Degree(s) or Certificate(s) would this course potentially be added? AS Degree in Computer Science

Date Proposal Given to Division CCC Rep:

Proposed Number: CS 30A

Proposed Title: INTRODUCTION TO LINUX & UNIX

Proposed Catalog Description:

An introduction to the Linux and UNIX operating systems primarily focused on command line usage. Covers the history, kernel, file systems, shells and user utilities. Also introduces students to the fundamentals of shell programming, processes, communications, and basic security.

Proposed Discipline: CS (Computer Science)

Comments & Other Relevant Information for Discussion: This course is based on a prior course CIS 68A which was taught successfully for several years.

Proposed Need/Justification Statement: This course is a restricted support course for the AS Degree in Computer Science

Date Proposal Given to Division CCC Rep:

Proposed Number: CS 30B

Proposed Title: LINUX & UNIX SHELL PROGRAMMING

Proposed Catalog Description:

This course teaches Linux shell script programming using the Bourne Again shell programming language (bash) and UNIX utilities to create practical shell scripts. Topics covered include customizing the environment, running and writing scripts, variables, loops, functions, text processing and debugging.

Proposed Discipline: CS (Computer Science)

Comments & Other Relevant Information for Discussion: This course is based on a prior course CIS 68B which was taught successfully for several years.

Date Proposal Given to Division CCC Rep:

Proposed Number: CS 30C

Proposed Title: LINUX & UNIX SYSTEM ADMINISTRATION

Proposed Catalog Description:

Introduction to basic system administration of Linux and UNIX systems. Overview of basic PC hardware, system boot process, administration utilities, and management of user accounts, file systems, basic networking, printing, security, accounting and logging. Software install and removal using source code and package managers. Kernel updating and boot managers.

Proposed Discipline: CS (Computer Science)

Comments & Other Relevant Information for Discussion: This course is based on a prior course CIS 68C which was taught successfully for several years.

Potential Foothill College CLEP List

Please discuss the table below with your discipline faculty, and determine how we should complete the following table/policy (modeled directly from Santiago Canyon College's CLEP policy). In particular, decide whether we offer an equivalent course(s) at Foothill and if so, you are willing to grant our students credit towards the major? AND, are you willing to allow students to use their CLEP exam toward the appropriate FH GE area?

<u>CLEP Exam</u>	<u>Which FH faculty need to review?</u>	<u>Min Score</u>	Foothill College			CSU System		
			<u>FH Course Equivalent? (note units) and if so, are we willing to grant credit for major?</u>	<u>AA GE Area</u>	<u>AA GE Credit?</u>	<u>Transfer Credit</u>	<u>CSU GE Credit</u>	<u>AH&I or GE Area</u>
American Government	HIST	50				3	3	D8

Foothill College: Curriculum Review of Prerequisites and Corequisites

The following language is from FHDA Board Policy 6060: Prerequisites and Corequisites

C. Curriculum Review Process

The District certifies that each College's Curriculum Committee has been established by mutual agreement of the administration and the Academic Senate as required in Section 55002(a) (1) of Title 5. The Curriculum Committees shall:

1. Establish prerequisites and corequisites only for one of the four purposes allowed in Section 55003(d) of Title 5, which are
 - a. the prerequisite or corequisite is expressly required or expressly authorized by statute or regulation; or
 - b. the prerequisite will assure, consistent with section 55002, that a student has the skills, concepts, and/or information that is presupposed in terms of the course or program for which it is being established, such that a student who has not met the prerequisite is highly unlikely to receive a satisfactory grade in the course (or at least one course within the program) for which the prerequisite is being established; or
 - c. the corequisite course will assure, consistent with section 55002, that a student acquires the necessary skills, concepts, and/or information, such that a student who has not enrolled in the corequisite is highly unlikely to receive a satisfactory grade in the course or program for which the corequisite is being established; or
 - d. the prerequisite or corequisite is necessary to protect the health or safety of a student or the health or safety of others.
2. Establish prerequisites, corequisites, advisories on recommended preparation and limitation on enrollment pursuant to Sections 55002, 55003, and 58106 of Title 5 only if
 - a. The faculty in the discipline or, if the college has no faculty member in the disciplines, the faculty in the department or division do all of the following:
 - (1) Approve the course; and,
 - (2) As a separate action, and only on a course-by-course basis, approve any prerequisite or corequisite, only if:
 - (a) The prerequisite or corequisite is an appropriate and rational measure of a student's readiness to enter the course or program as demonstrated by a content review including, at a minimum, all of the following:
 - (i) involvement of faculty with appropriate expertise;
 - (ii) consideration of course objectives set by relevant department(s). The

curriculum review process should be done in a manner that is in accordance with accreditation standards.

(iii) be based on a detailed course syllabus and outline of record, tests, related instructional materials, course format, type and number of examinations, and grading criteria;

(iv) specification of the body of knowledge and/or skills which are deemed necessary at entry and/or concurrent with enrollment;

(v) identification and review of the prerequisite or corequisite which develops the body of knowledge and/or measures skills identified under (iv);

(vi) matching of the knowledge and skills in the targeted course (identified under iv) and those developed or measure by the prerequisite or corequisite (i.e., the course or assessment identified under v.) ; and

(vii) maintain documentation that the above steps were taken.

3. Verify and provide documentation that prerequisites or corequisites meet the scrutiny specified in one of the measures of readiness specified in section 55003 of Title 5. These include content review (Title 5 Section 55003(c)), or content review with statistical validation (section 55003(f-g)). Pursuant to 55003(e), a prerequisite or corequisite need not be scrutinized using one of these measures only if
 - a. it is required by statute or regulation; or
 - b. it is part of a closely-related lecture-laboratory course pairing within a discipline; or
 - c. it is required by four-year institutions.; or
 - d. baccalaureate institutions will not grant credit for a course unless it has the particular communication or computation skill prerequisite.
4. Ensure that no exit test is be required to satisfy a prerequisite or corequisite unless it is incorporated into the grading for the prerequisite or corequisite course (Title 5 Section 55003(n)).
5. Ensure that as a regular part of the Program Review process or at least every six years, the college reviews each prerequisite, corequisite, advisory or limitation on enrollment pursuant to Section 55003(b)(3) of Title 5 to establish that each is still supported by the faculty in the discipline or department and by the curriculum committee and is still in compliance with all other provisions of this policy and with the law. Any prerequisite or corequisite which is successfully challenged under subsections(1), (2), or (3) of Section 55201(f) shall be reviewed promptly thereafter to assure that it is in compliance with all other provisions of the law.

CONTENT REVIEW - FORM A

Computational Advisories, Prerequisites and Co-requisites

Department or Program Name and Number and Title of course being reviewed: _____

Recommended Advisory/Prerequisite/Co-requisite*: _____
 (*circle one)

For Computational Advisories/Prerequisites/Co-requisites, students should be able to:
 (check from the list below and/or use the opposite side of this form)

_____	Perform arithmetic operations with fractions, decimals, percents, and signed numbers	Math 200
_____	Perform basic algebraic operations with exponents	Math 101
_____	Add, subtract, multiply and divide polynomials	Math 101
_____	Solve simple inequalities	Math 101
_____	Solve linear equations in one variable	Math 101
_____	Understand coordinate systems and graph linear equations	Math 101
_____	Solve systems of linear equations	Math 101
_____	Solve equations using rational expressions	Math 105
_____	Solve problems using roots and radicals	Math 105
_____	Solve and graph quadratic equations	Math 105
_____	Perform calculations using exponents and logarithms	Math 105
_____	Perform basic operations with complex numbers	Math 105
_____	Solve problems using the trigonometric functions	Math 51
_____	Perform calculations involving two dimensional vectors	Math 51
_____	Perform calculations with complex numbers in trig form	Math 51
_____	Understand function notation, composites, domain, range and other operations	Math 49
_____	Understand functions of many types (polynomial, rational, radical, exponential, logarithmic, etc.)	Math 49
_____	Perform calculations and graph functions and their inverse functions	Math 49
_____	Recognize and work with the conic sections	Math 49
_____	Understand translations, scaling, and average rates of change of functions	Math 49
_____	Find roots of equations	Math 49
_____	Solve inequalities	Math 49
_____	Perform matrix operations and computations	Math 11 or Math 2B

CCC Division Rep's Signature: _____ Date: _____

(not required for Advisories)

Articulation Officer: _____ Date: _____

Matriculation Officer: _____ Date: _____

For the Mathematics Department: _____

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

CONTENT REVIEW - FORM B

Communication Advisories, Prerequisites and Co-requisites

Department or Program Name and Number and Title of course being reviewed: _____

Recommended Advisory/Prerequisite/Co-requisite*: _____

(*circle one)

For Communication Advisories/Prerequisites/Co-requisites, students should be able to:
(check from the list below and/or use the opposite side of this form)

Reading:

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| _____ follow the progression of ideas in a text. | ENGL 100/ESL 25 |
| _____ identify and distinguish main and subordinate ideas. | ENGL 100/ESL 25 |
| _____ interpret a writer's meaning inferentially as well as literally. | ENGL 100/ESL 25 |
| _____ recognize a writer's purpose (to persuade, to inform, to entertain, etc.) | ENGL 100/ESL 25 |
| _____ define unfamiliar words by decoding (word parts, phonetic clues, etc.) by using contextual clues, and/or by using a dictionary. | ENGL 100/ESL 25 |
| _____ read with flexibility to revise, refine, or replace a tentative thesis as one progresses through or rereads a text. | ENGL 100/ESL 25 |
| _____ recognize clues of structure (e.g. paragraphing and transitional expressions) and content (e.g. synonyms and examples) to decode meaning. | ENGL 100/ESL 25 |
| _____ identify and analyze points of comparison between texts and articulate similarities and differences. | ENGL 100/ESL 25 |
| _____ summarize ideas in one's own words. | ENGL 100/ESL 25 |
| _____ understand connotations, denotations, and multiple meanings of basic English vocabulary at a high school level. | ENGL 100/ESL 25 |

Writing:

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| _____ generate ideas within given time constraints. | ENGL 100/ESL 25 |
| _____ respond appropriately to a given writing task. | ENGL 100/ESL 25 |
| _____ formulate a clear central idea in an essay. | ENGL 100/ESL 25 |
| _____ organize ideas into a logical sequence so that the central point of the essay is developed to a logical conclusion. | ENGL 100/ESL 25 |
| _____ present one's own ideas as related to, but clearly distinguished from, the ideas of others, including the ability to avoid plagiarism. | ENGL 100/ESL 25 |
| _____ support one's opinions and conclusions, including the effective use of examples, evidence, and reasoning. | ENGL 100/ESL 25 |
| _____ revise and restructure where ideas are poorly organized or where evidence is lacking. | ENGL 100/ESL 25 |
| _____ proofread for errors in language and mechanics to the degree that the nature and frequency of errors does not become distracting. | ENGL 100/ESL 25 |

CONTENT REVIEW - FORM C**Non-Communication/Non-Computational Advisories, Prerequisites and Co-requisites**

Department or Program Name and Number and Title of course being reviewed: _____

Recommended Advisory/Prerequisite/Co-requisite*: _____

(*circle one)

For Advisories/Prerequisites/Co-requisites that don't involve communication or computational skills, students should be able to:

(check from the list below and/or use the opposite side of this form)

List below the specific elements of knowledge, experience or other competencies necessary for a student to have reasonable chance of success in this course (for example: a health/safety quiz, keyboarding skills, knowledge of software applications, etc.). You should use the course outcome statements from the above recommended course to help you with this task. Use the other side of this form if necessary.

Note: Also include two more faculty from the appropriate discipline if the recommended requisite is outside of your discipline.
